PWM	1	Header 2	Header, 2-Pin	HDR1X2	PWM Output	
BAT	1	Header 2	Header, 2-Pin	HDR1X2	Battery power	
SPI	1	Header 3	Header, 3-Pin	HDR1X3	SPI port (Wifi module)	

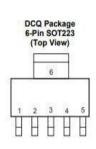

Revision History:

- V2.1: C1, C5 to 20pF since the value needed is quite low, some 30pF var capacitor do not allow to regulate around 6pF.
- V2.0: Removed J1, directly use PA2 pin for Vref, PWM become 2 pin header, added SP header (Serial Port), U1,U3 use SOP module.
- V1.6: Removed duplicated R8, Added comment for C2, C6.
